1. Do all updates. Click the Apple in the top right corner of the screen and select Software Update...

2. Check to see if a W-Release entry exists in Keychain Access. If so, delete it. Go to Applications | Utilities | Keychain Access | highlight W-Release | press delete key | click delete

   **If you cannot connect to WUFI-S go to: [http://nss.wustl.edu/node/337](http://nss.wustl.edu/node/337) for instructions**

4. Under “CUPS for Administrators” click on “Adding Printers and Classes”

5. Under “Printers” click “Add Printer” At this point you may be asked for your Mac username and password.
6. Under “Add Printer” select “Windows Printing via spoolss” and click Continue

![Add Printer]

![Add Printer]

8. Under “Add Printer” in the “Name” box type: W-Release
   In the “Location” box type: A-B Hall and click Continue

![Add Printer]

10. In the “Model” box scroll all the way down to, HP Laserjet 4100 Series v.3010.107 and click Add Printer. If the HP Laserjet 4100 Series v.3010.107 is not an option download and install HP Printer Drivers V.2.7 from here: [http://support.apple.com/kb/dl907](http://support.apple.com/kb/dl907)
11. Under “Options Installed” use the following settings:
   Tray 3: Installed
   Tray 4: Not installed
   Duplex Unit: Installed
   Printer Disk: None
   Envelope Feeder: Not Installed
   Fit to Page: Prompt User
   Total Memory: 16 – 23 MB

   And click Set Default Options
